OPEN AIR

Caravanning Range

12V FULL INVERTER

DESIGNED TO DISCONNECT

INNOVATIVE AIR CONDITIONING FOR MOTORHOMES AND CAMPERS

Power, comfort and autonomy, all in one system

OpenAir 12V Full Inverter cools any motorhome up to 7 metres in record time.

It provides powerful cooling with low noise and high energy efficiency thanks to its Full Inverter(*) technology. Great energy savings and increased equipment durability.

Enjoy the perfect temperature wherever you go

With an average consumption of 14,4A, **OpenAir 12V Full Inverter** is capable of keeping your motorhome at 24°C with an outside temperature of 30°C.

(*) Inverter compressor and condenser fan with variable speed

No plugs or connectors

Operates on 12V connected to battery only.

Improved Aerodynamics

Low profile (20 cm) that avoids height issues, improves wind-resistance and fuel efficiency.

LED ambient light

Dimmable LED ambient light with adjustable intensity.

Touch Screen

Screen control from the console through touch system.

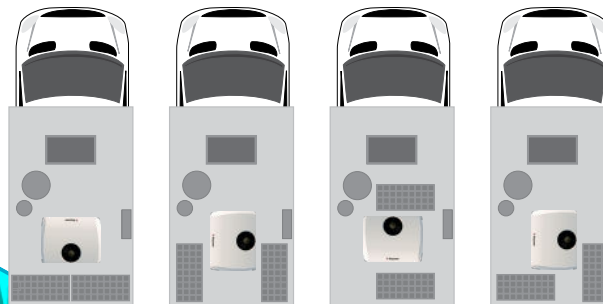

IR Remote Control

A comfortable remote with a convenient size and easy to use.

Different Assembly Positions

Pick the assembly option that suits the distribution of your vehicle's roof best.

Fast and easy installation

It can be easily set up in any motorhome, and requires minimum maintenance.

TECHNICAL FEATURES

Voltage	12 V
Cooling power complying with ISO 5151:T1	1.200 W 2.020 W
Electrical consumption complying with ISO 5151:T1 (*)	16 - 32,4 A - 1.200 W 16 - 56,4 A - 2.020 W
Average Consumption	14,4 A (24°C inside / 30°C outside)
External Unit Dimensions (L x W x H)	786 x 986 x 200 mm
External Unit Weight	25,3 kg
Internal Console Dimensions (L x A x H)	520 x 520 x 45 mm
Internal Console (with fixing brackets) Weight	5,69 kg
Control Panel	Touch System
Remote Control	IR
LED Ambient Light	Yes
Maximum Ideal Vehicle Length	Up to 7 meters
(*) Electrical consumption (ventilator mode only)	1,6 - 7,1 A
